## Congrès Francophone d'Allergologie

Paris  
Palais des Congrès Porte Maillot  
19 au 22 avril 2016

# jRA 2016

## journée "Recherche en Allergologie"

### Mardi 19 avril 2016

#### Introduction

9h15-9h30

**Antoine Magnan**, *Président de la Société Française d'Allergologie (SFA)*

#### Opening Conference

9h30-10h15

*Chair: Antoine Magnan & Marc Daëron*

**Harald Renz**, *Philipps University Marburg*: Environmental microbes and allergy development

#### Allergology Tomorrow

10h15-10h45

*Chair: Harald Renz & Valérie Verhasselt*

**Martijn Schuijs**, *VIB and University of Gent*: Farm dust protects against allergy through A20 induction in airway epithelial cells

10h45-11h15

**Laetitia Everaere**, *Institut Pasteur, Lille*: The role of innate lymphoid cells in asthma associated with obesity

11h15-11h45

*Coffee Break*

11h45-12h15

**Delphine Staumont**, *Hôpital Claude Huriez, Lille*: CX3CL1 (fractalkin) and its receptor CX3CR1 regulate atopic dermatitis by controlling effector T cells in inflamed skin

12h15-12h45

**Gaël Ménasché**, *Institut Imagine, Hôpital Necker-Enfants Malades, Paris*: Characterization of the transport machinery regulating FcεRI-mediated mast cell degranulation

#### Shorts Talks

12h45-13h15

*Chair: Anne Tsicopoulos & Valérie Verhasselt*

**Magali Savignac**, *Centre de Physiopathologie de Toulouse-Purpan*: Cav1.2 and Cav1.3 calcium channels are critical but non-redundant function during allergic asthma

**Audrey Nosbaum**, *Centre International de Recherche en Infectiologie, Université de Lyon*: Regulatory T cells Facilitate Cutaneous Wound Healing

**Laurent Mascarell**, *Stallergenes Greer, Antony*: Changes in markers associated with regulatory/pro-allergic dendritic cells (DCreg/DC2) in peripheral blood correlate with clinical benefit during allergen-specific immunotherapy

**Carole Brosseau**, *Institut du thorax, Nantes*: Molecular mechanism induced by CD9<sup>+</sup> regulatory B cells to induce effector T cell apoptosis: a new therapeutic strategy for severe asthma

13h15-14h30

*Lunch and poster viewing*

#### Progress in Allergology

14h30-15h00

*Chair: Eric Vivier & Anne Tsicopoulos*

**Andreas Diefenbach**, *Institute of Medical Microbiology and Hygiene, University of Mainz*: The role of innate lymphoid cells in maintaining tissue homeostasis

15h00-15h30

**Caspar Ohnmacht**, *Technical University and Helmholtz Center, Munich*: Counter-regulation of type 2 and type 3 immunity

15h30-16h00

**Bertrand Bellier**, *Hôpital Pitié-Salpêtrière, Paris*: Low-dose interleukin-2 induces regulatory T-cell mediated control of experimental food allergy

16h00-16h30

*Coffee Break*

16h30-17h00

**Gabriele Schramm**, *Research Center Borstel, Leibniz-Center for Medicine and Biosciences, Borstel*: Learn from the Worm - Concepts for Therapy and Prevention of allergic Diseases

#### Closing Conference

17h00-17h45

*Chair: Marc Daëron & Philippe Bonniaud*

**Eric Vivier**, *Centre d'Immunologie de Marseille-Luminy, Marseille*: Innate lymphoid cells: a new world of lymphocytes

#### Conclusion

17h45-18h00

**Philippe Bonniaud**, *Président du Conseil Scientifique de la SFA*
